Receiving Pointer Events while considering the Z-index

For those of you having problems with getting the correct element to receive pointer events, take a look at the pointer-events CSS property. It will allow you to receive mouse events for elements that are beneath elements with higher Z-indices.

`ps3`

~ An instructor (Xiaoxue Liu) thinks this is a good note ~

you can also turn off pointer-events for specific elements by using the property (for example the arrow that gets drawn on top probably shouldn't be clickable)
